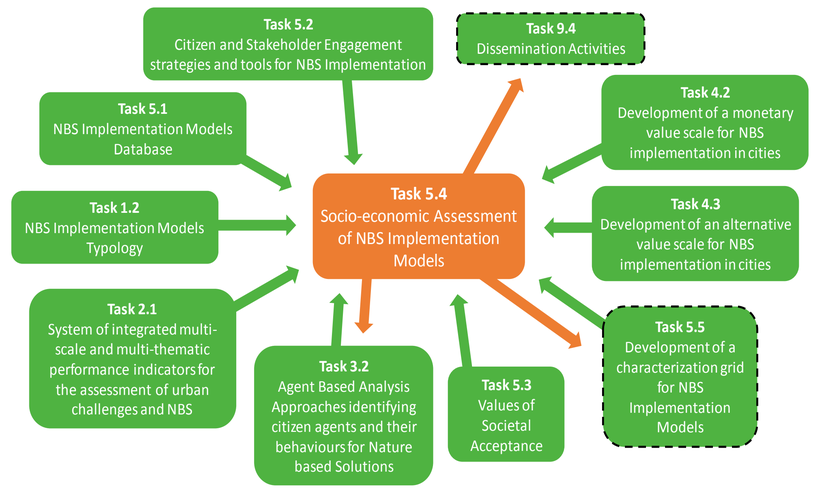
NATURE 4 CITIES

A knowledge diffusion and decision platform for renaturing cities

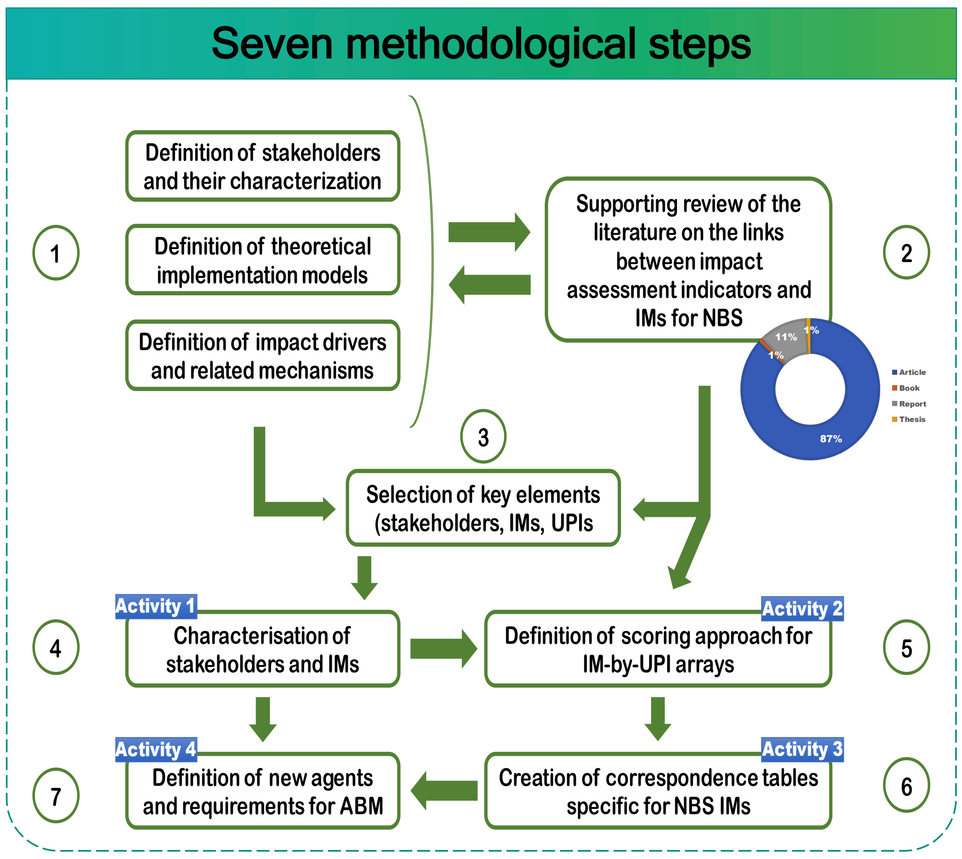
Socio-economic Assessment of NBS Implementation Models



Objectives

1. to characterize the **socio-economic impact of NBS projects** taking into account the choice of **specific Implementation Models (IMs)**
2. to prospect an adjustment to the **types and definition of stakeholders** included in previously developed **agent-based models (ABMs)** of Task 3.2

Seven methodological steps



Activity 1

READ ME: Stakeholders characterization (number of times specific stakeholder typologies have been observed)
